

Animal Welfare & Protection

A symbiotic relationship between humanity and our planet hinges on safeguarding the diverse array of animal species we share it with. To advance the cause of animal welfare, the Nando and Elsa Peretti Foundation collaborates with individuals, organisations, and professional institutions dedicated to elevating standards in animal care across various spheres. Aligned with our commitment to fostering enduring change, we prioritise initiatives aimed at reshaping humanity's relationship with animals. This encompasses a spectrum of endeavours, including educational programs designed to instil empathy and compassion towards animals among children and youth, advocacy campaigns driving legislative reforms to bolster animal welfare protections, research initiatives exploring the therapeutic benefits of animal interactions for vulnerable populations, and more. Additionally, we extend our support to emergency interventions aimed at safeguarding animals endangered, abused, or imperilled due to environmental crises or political strife.
